•

There is a broad range of assessment instruments well supported in a digital learning environment which include advance documentation; which make use of effective skills-based approaches and provide students with the opportunity to perform to the best of their ability.

7b. Are there any particular areas of good practice in relation to standards and assessment processes that would be worthy of dissemination to a wider audience?

In line with previous years all the materials and assessments across all three subjects are of a very high standard and extremely rigorous. They continue to be reflective of professional practice and ensure that the students have ample opportunity to demonstrate the breadth and depth of their knowledge. The conduct of the virtual exams board was exemplary and due consideration provided for all students. Stuart continues to consult with all externals closely and is very transparent in his approach. The University demonstrates excellent consistency across all the differing modes of delivery and the digital accessibility that we have as externals to all the relevant material and sample scripts is excellent following the introduction of a new system this year. It is clear and easy to navigate and facilitates the role of an external providing an excellent overview of all the marks.
